FEE CALCULATION PROCEDURE

APPROVED BY:
7TH WCCE GENERAL ASSEMBLY, 23 NOVEMBER 2012

APPLICABLE TO ORDINARY MEMBERS (WITH VOTING RIGHT):

NATIONAL MEMBERS

Fees are calculated according to their listing in the World Bank's Country classification. For operational and analytical purposes, the World Bank's main criterion for classifying economies is gross national income (GNI) per capita. Based on its GNI per capita, every economy is classified as **low income**, **middle income** (subdivided into **lower middle** and **upper middle**), or **high income**. The country classification is updated on a yearly basis and may be consulted on the following website: <http://data.worldbank.org/about/country-classifications/country-and-lending-groups>.

This only approach would bring the same fee to countries with huge differences in population will burden little countries with high incomes. Being our interest the equality of any countries within our organization a Population correction Index has been drafted to address such issue.

FEE CALCULATION PROCEDURE:

RICHNESS INDEX

The **Richness Index (RI)** is established by cross-referencing World Bank's Country Classification with the following table.

| Stage | Richness Index (RI) |
|------------------------------------|---------------------|
| Low income (LI) | 1 |
| Lower middle income (LMI) | 2 |
| Upper middle income (UMI) | 3 |
| High income (HI) | 4 |

POPULATION CORRECTION INDEX (PCI)

The **Population Correction Index (PCI)** establishes fee discounts to countries with small countries. Bigger countries will not have their Richness Index modified, while others will downgrade his level to lower fee categories. The population data to be used for cross referencing with the following table can be consulted in the following link: <http://data.worldbank.org/indicator/SP.POP.TOTL>. This population index is developed according to the following list.

| Population | Population Corrective Index (PCI) |
|-----------------------|-----------------------------------|
| 0-2,000,000 | -3 |
| 2000000-10,000,000 | -2 |
| 10,000,000-18,000,000 | -1 |
| 18,000,000+ | 0 |

FEE CALCULATION PROCEDURE

APPROVED BY:
7TH WCCE GENERAL ASSEMBLY, 23 NOVEMBER 2012

FEE CATEGORY (FC)

The fee category is calculated according to the following formula

$$\text{FEE CATEGORY (FC)} = \text{RICHNESS INDEX (RI)} - \text{POPULATION CORRECTION INDEX (PCI)}$$

The country fee will be established according to one the following fee categories

| Fee Category | Fee |
|--------------|---------|
| 1 | 350 € |
| 2 | 700 € |
| 3 | 2.100 € |
| 4 | 5.000 € |

CO-MEMBERSHIP ADJUSTMENT FACTOR (CAF)

To further promote national membership and increase participation in WCCE, **National Members which are in good standing within International Members of WCCE who are also in good standing, will receive a 25 % annual reduction in their corresponding fee.** Evidence of good standing with the International Organization needs to be provided for the discount to apply. This will also act as an incentive for participation in the International Organizations within WCCE. This incentive will not be retroactive.

| Co-Membership | CAF |
|---------------|------|
| Yes | 0.75 |
| No | 1 |

$$\text{FEE VALUE (FV)} = \text{FEE CATEGORY VALUE (FCV)} \times \text{CO-MEMBERSHIP ADJUSTMENT FACTOR(CAF)}$$

EXAMPLE:

Kuwait is classified according to the World Bank's Country Classification as a **High Income Economy**

| Stage | Richness Index (RI) |
|---------------------------|---------------------|
| Low income (LI) | 1 |
| Lower middle income (LMI) | 2 |
| Upper middle income (UMI) | 3 |
| High income (HI) | 4 |

With brings that Kuwait's **Richness Index, RI = 4**

FEE CALCULATION PROCEDURE

APPROVED BY:
7TH WCCE GENERAL ASSEMBLY, 23 NOVEMBER 2012

According to World Bank's Statistics Kuwait has a population of 2.818.042 inhabitants,

| Population | Population Corrective Index (PI) |
|-----------------------|----------------------------------|
| 0-2.000.000 | -3 |
| 2.000.000-10.000.000 | -2 |
| 10.000.000-18.000.000 | -1 |
| 18.000.000+ | 0 |

Which provides a **Population Corrective Index, PCI=-2**

Provided that **FC= RI + PCI= 4-2 =2**, and cross referencing the value with the following table

| Fee Category | Fee |
|--------------|---------|
| 1 | 350 € |
| 2 | 700 € |
| 3 | 2.100 € |
| 4 | 5.000 € |

Kuwait's membership **FEE CATEGORY VALUE** comes to **700 €**

| Co-Membership | Fee |
|---------------|------|
| Yes | 0.75 |
| No | 1 |

As Kuwait holds no co-membership with no other International member, its **Co-membership Adjustment Factor, CAF =1**

So, **FV=FCV x CAF = 700 x 1 = 700 €**, remaining the same as its Fee Category Value.
